

## **IT/Website committee**

Chair: Jie Song

Co-Chairs: Xiangdong (Don) Xu, Di (Andy) Ai, Jinming (Jimmy) Song

The goals and responsibilities of the IT/Website committee include:

- Update web contents in a timely manner, including announcements, events, newsletters and other official documents.
- Provide technical support to the membership committee, ensure the function and security of the online payment system and the user management system.
- Maintain the website and solve any software problems.
- Manage CAPA online elections.

Plan for 2021:

The committee plans to continue undertaking its responsibilities outlined above in a timely manner. We will find and train co-webmaster(s) to ensure the continuity of technical support in the future. We will test and open the new Case Forum for CAPA members to post and share their pathology cases.

How to measure success:

Since the IT/Website committee is primarily a service provider, we will continue to listen to feedbacks from other CAPA committees and members, to improve our service.
